## STANDARD MEDICAL RECLINER

Why should you choose a Champion Medical Recliner?

Patient comfort, ease of use, dependability and long life make ours one of the most popular recliners for oncology, surgery, infusion therapy, dialysis and other patient needs.

- **Comfort.** Pressure-reducing foam conforms to patients' bodies, and patients can easily adjust the recliner to the most comfortable position — from full upright to full recline.

- **Ease of use.** The chairs' innovative design makes it easy for your staff to transfer patients — and clean the recliner. Also, when positioned close to a wall, the chair can move to a full recline position without making contact with the wall, through its unique wall-hugger mechanism.

- **Durability.** All-steel frame structure, premium components and quality construction give years of trouble-free service with proper use.

- **Advanced technology options.** State-of-the-art components add greater patient comfort as well as safety and efficiency for staff. (See page 8 for details.)

### FIVE-INCH WHEEL OPTION.

Corrosion-resistant thermal plastic casters make this chair ideal for transporting patients. Plus, the higher seat brings patients closer to caregivers, improving staff comfort.

### THREE-INCH WHEEL OPTION.

Three-inch ball-bearing casters provide an effective alternative when patient transport is not required.

### STATIONARY OPTION.

The perfect choice for home treatment or when moving the recliner is limited.

Back Height (from floor/seat)	48"/29"
Overall Width (2 table down/up)	32"/52"
Seat Width	22.5"
Arm Height from Floor (front/back)	30"/27"
Seat Height/Depth	22.5"/18"

Seat Height/Depth	18.5"/18"
Upright Overall Depth (w/handle)	47"
Trendelenburg Dept (ext. length)	74"
Weight Capacity	300 lbs.

MEDICAL RECLINERS

# BARIATRIC MEDICAL RECLINER

To accommodate patients up to 500 pounds, we modified the frame of our Standard Medical Recliner while retaining all its other great features. As a result, the chair is five inches wider, three inches deeper — and equally high performing.

equally high performing.

- **Comfort.** Pressure-reducing foam conforms to patients' bodies, and patients can easily adjust the recliner to the most comfortable position — from full upright to full recline.
- **Ease of use.** The chairs' innovative design makes it easy for your staff to transfer patients — and clean the recliner. Also, when positioned close to a wall, the chair can move to a full recline position without making contact with the wall, through its unique wall-hugger mechanism.
- **Durability.** All-steel frame structure, premium components and quality construction give years of trouble-free service with proper use.
- **Advanced technology options.** State-of-the-art components add greater patient comfort as well as safety and efficiency for staff. *(See page 8 for details.)*

MEDICAL RECLINERS

**FIVE-INCH WHEEL OPTION.** Corrosion-resistant thermal plastic casters make this chair ideal for transporting patients. Plus, with the higher seat, patients are closer to caregivers, improving staff comfort.

Back Height (from floor/seat)	49"/29"

Arm Height from Floor (front/back)	30"/27"
Seat Height/Depth	24"/21"
Upright Overall Depth (w/handle)	50"
Trendelenburg Depth (ext. length)	77"
Thermal Plastic Casters	5"
Weight Capacity	500 lbs.

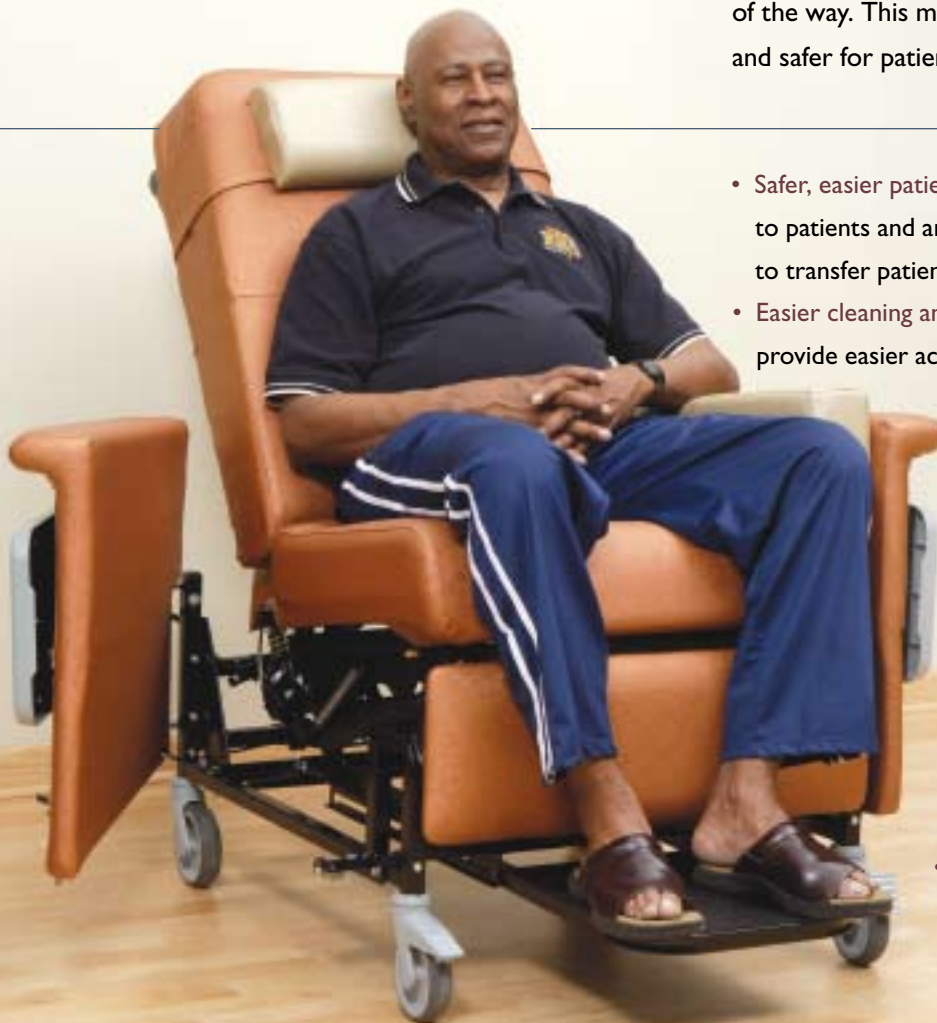

**THREE-INCH WHEEL OPTION.** Single or dual three-inch ball-bearing casters provide an effective alternative when patient transport is not required.

Back Height (from floor/seat)	47.5"/29"
Overall Width (2 table down/up)	37"/57"
Seat Width	27.5"
Arm Height from Floor (front/back)	28.5"/25.5"
Seat Height/Depth	22.5"/21"
Upright Overall Depth (w/handle)	50"
Trendelenburg Depth (ext. length)	77"
Steel Casters	3"
Weight Capacity	500 lbs.

## MEDICAL RECLINER WITH SWING-AWAY ARMS

The Swing-Away Arms version of our popular Medical Recliner is built with heavy-duty latches and hinge mechanisms that allow the arms to swing out of the way. This makes transferring patients easier and safer for patients and staff.

- Safer, easier patient transfers. Better staff access to patients and an obstacle-free seat make it easier to transfer patients.
- Easier cleaning and maintenance. The extended arms provide easier access to the quick-release seat, simplifying the cleaning process.
  - Great for bariatric patients. Swing-Away Arms are available with the bariatric model, providing easier access for patients weighing up to 500 pounds.
  - Corrosion-resistant wheels. Five-inch thermal plastic casters equip this chair to effectively transport patients.
- Advanced technology options. State-of-the-art components add greater patient comfort as well as safety and efficiency for staff. (See page 8 for details.)

**FIVE-INCH WHEEL OPTION.** Corrosion-resistant thermal plastic casters make this chair ideal for transporting patients. Plus, with the higher seat, patients are closer to caregivers, improving staff comfort.

Back Height (from floor/seat)	48"/29"
Overall Width* (2 table down/up)	32"/52"

MEDICAL RECLINERS

## COMFORT, EASY OPERATION AND LONG LIFE

Champion Medical Recliners are designed for the most rigorous applications, including round-the-clock usage and the ultimate in patient comfort and convenience for staff.

### BUILT FOR DURABILITY

Thanks to its rugged, all-steel skeleton and lifetime lubrication, Champion Medical Recliners are built for long-term use.

Drive-link bar provides 80 percent more strength than pushback style mechanisms used in other medical recliners.

Metal frames and components are powder coated to resist corrosion — even with a lifetime of cleaning done according to product guidelines.

CONSTRUCTION  
AND DESIGN

6

For optimal comfort, patients can easily change recline positions — to any point from full upright to recline. Positions are changed by patients simply shifting their weight in the manual Medical Recliners or activating the handy remote control on the Power Recliner.

The optional Trendelenburg function allows caregivers to quickly and smoothly place a patient in distress into a flat-body, 12-degree head below feet position. Recliners are weight-balanced over the center of the chair for stability and patient safety.

# MAXIMUM PATIENT COMFORT

## OPERATIONAL EASE AND CONVENIENCE FOR STAFF

Thermal-sensitive foam reacts to a combination of heat and weight to contract. This enables better conformity to body contours, for superior comfort and support for the patient.

Grab handle behind the seat, along with the back steering casters and front brake casters, help ease maneuvering and transportation.

Zero wall clearance feature allows full recline without the chair back extending and making contact with the wall, saving space and avoiding damage to the facility.

Quick-release seat, standard on every Champion recliner, provides ready access to the inside area of the chair for easy cleaning, repair or maintenance.

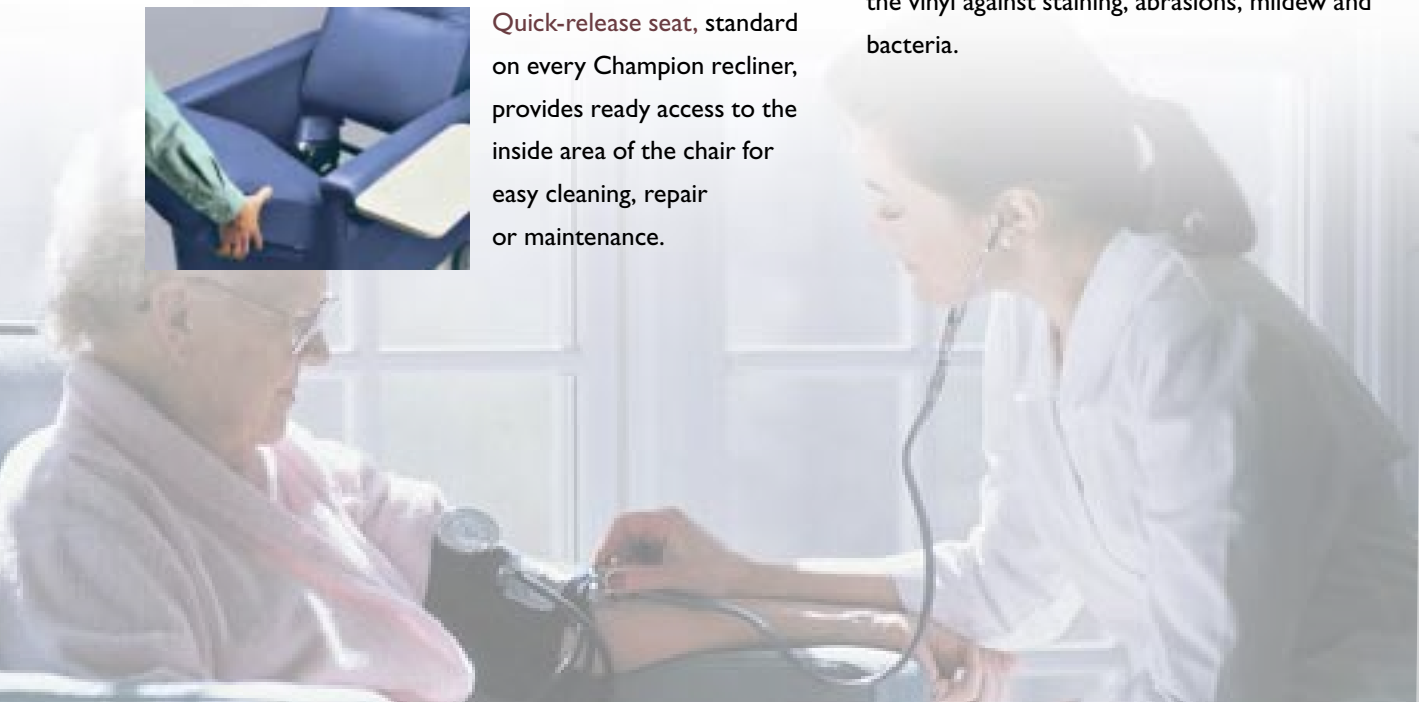

## FABRIC AND DÉCOR OPTIONS

We have a variety of fabrics, colors and patterns, all representing the finest materials in the medical industry. With options including standard medical colors and patterns, custom fabrics and PVC-free materials, you're sure to get the fabric that best fits your décor.

- You can choose from an almost infinite selection of standard and custom color vinyl fabrics. All feature a protective finish so your recliners will retain their great looks for years to come.
- PVC-free materials come in a wide array of colors, and the fabric has superior seam, puncture and tear strength. The materials also have outstanding durability and abrasion resistance plus environmentally-friendly benefits.

## INFECTION CONTROL

Special finishes on our standard vinyl and other fabrics help you meet stringent infection control requirements. A protective finish has been applied to all our vinyl fabric recliners, helping protect the vinyl against staining, abrasions, mildew and bacteria.

## ADVANCED TECHNOLOGY OPTIONS

At Champion, we're committed to meeting your needs for greater patient comfort as well as safety, ergonomics and efficiency for staff. This is why we're always involved in research and development, listening to caregivers like you. It's also why we give you the greatest degree of flexibility by offering products that include advanced technology components like those below.

ADVANCED TECHNOLOGY OPTIONS

8

### POWER MEDICAL RECLINER

The Power Medical Recliner comes with a handy remote control patients can use to select the position most comfortable to them.

- With minimal physical effort, patients can change recline positions, to any point from full upright to full recline, for optimal comfort.
- Power function reduces staff assistance, thereby increasing operational efficiency.
- The unit is available with a manual release for the Trendelenburg position which includes safety features for protecting your patients.
- Battery back-up option keeps the recliner fully functioning during transport or short-term power outages.

## PATIENT WARMING SYSTEM

The Patient Warming System provides gentle heat sources in both the recliner seat and seat back of any caster-supported Champion Medical Recliner.

- Patients are kept comfortable by maintaining a selected temperature of 95°, 100° or 105° F (+/- 2°F). These presets help keep patients comfortable while safeguarding against overheating.
- Table-top switch is easily controlled by the patient or caregiver. This gives some patients needed control over their immediate environment while helping caregivers to be more efficient.
- The automatic one-hour shutoff is a safety-minded

feature, helping protect patients against accidental overheating and facilities from unnecessary cost when recliner is not being used.

ADVANCED  
TECHNOLOGY  
OPTIONS

9

## INTEGRATED PATIENT SCALE

As an added option to our Standard Medical Recliners, the Integrated Patient Scale allows staff to continuously monitor patient weight change throughout treatment.

- The integrated scale reduces the potential of patient falls and caregiver injuries that can occur when patients are being moved to a remote scale during treatment.
- Caregivers can continuously monitor and record patient weight change during treatment, for improved accuracy and efficiency.
- The integrated scale is available with all our caster-supported Medical Recliners. Your existing Champion recliners can be efficiently retrofitted with the integrated scale.

## ACCESSORIES

Our Medical Recliners are available with a number of useful accessories, many resulting from input from customers like you. So you can be assured Champion accessories will add comfort and convenience to patients and caregivers alike.

### ADDED COMFORT

Nocturnal pad provides a comfortable, flat surface, enabling you to use the same recliner for daytime treatment and overnight sleeping.

- It's designed to fit any of our Medical Recliners.
- Utilizing the same high-quality materials as our Medical Recliners, nocturnal pads can be easily disinfected.
- Nocturnal pads are simple to install and store.
- Colors coordinate with recliners.

ACCESSORIES

10

Adjustable head/lumbar support pillow serves as a comfortable headrest when positioned high and gives great lumbar support when placed mid-back.

Cushion wedge narrows the Medical Recliner seat by four inches, helping to reduce arm fatigue and improve overall patient comfort.

## ADDED CONVENIENCE

**Over-the-lap tray** makes it easier and more convenient for patients to enjoy any number of activities including reading, games, meals and snacks. It's simple to put in place, remove and transfer to another recliner.

**Swing-away table** rotates a full 360 degrees and remains attached to the chair. This makes it easy and convenient for patients to enjoy any number of activities during treatment. It also assists caregivers in administering treatment.

**IV poles** are available in two-hook or four-hook versions. Easily mounted to the recliner and simple to use, the brackets simplify management of infusion therapy and assist in saving floor space. A rolling base IV pole is also available.

**Breakaway (removable) arm** makes it easier to transfer patients to and from a wheelchair or bed. It also gives caregivers easier access to patients during treatment.

**Arm covers** decrease wear and tear on the recliner arms, making cleaning easier while increasing the life of the fabric. They're fitted tightly over the arm, providing improved infection control.

**Oxygen tank holder** can be mounted for increased safety and convenience.

ACCESSORIES

## OVERNIGHTER SERIES

Overnighter Chairs represent the perfect seating/sleeping combination for patient rooms and other areas of your facility where overnight visitors are welcome. The time-tested leader of sleeper chairs, the Overnighter Series perfectly balances cost and quality to give you the most comfortable, durable and lowest-maintenance overnighter chairs in the industry. Chairs are built on a steel frame, powder-coated to resist corrosion. Select from a variety of standard or custom colors to match your décor.

### DESIGNER SLEEPER CHAIR

- The newest model in our overnighter series, the Designer Sleeper Chair dresses up any visitor's area.
- Storage compartment makes stowing personal items easy and convenient for guests.
- Multiple lounge positions provide greater seating options.
- Wall-hugger mechanism means chair does not have to move for sleeping.
- Optional features include (1) Amish-crafted wood armrest/skirt package in five finishes: Natural, Honey, Nutmeg, Cherry and Espresso. (2) Non-standard vinyl and (3) CAL-133 fire barrier.

## CAREGIVER SEATING

We know that as a caregiver, you spend too much time on your feet. So the more comfortable your seating is, the better. This is why we offer comfortable Caregiver Task Chairs and Caregiver Clinic Stools. Chair height is easily adjusted, for maximum convenience. Vinyl bumper, on units with optional back, protects the backrest and your walls from cuts, scrapes and wear. Everything is available in a choice of colors — including custom fabrics — to match your décor and other seating products.

CAREGIVER SEATING

## CAREGIVER TASK CHAIRS

Here's the ideal choice for nurse's stations, computer terminals, clinic offices, lab rooms or other applications requiring a higher countertop access.
