

# Recliners for Infusion Therapy

For over 26 years, our experience in designing successful patient and seating solutions for a variety of healthcare environments has placed us in many of the top hospitals and 5-star clinics in the USA.

We understand the operations of infusion therapy. The patient recliner is an integral part of the treatment process which provides support for the patient and is a necessary tool for the caregiver. Designed specifically to address the needs of a clinical environment, the Champion recliner delivers where others fall short.

**Key features of Champion infusion recliners include:**

- Trendelenburg for critical moments (12° flat-body position)
- Swing-open arms for patient transfer and cleanability
- Heat to help keep patient warm and comfortable
- “Infinite recline” positions for maximum patient comfort
- Wide arm surface for setting the IV
- Wall-hugger design, saving valuable floorspace

## 1 ASCENT INFUSION POWER RECLINER

Modern styling with powered recline for consistent control of recline functionality throughout treatment. Built for transport, clinical efficiencies, and maximizing floorspace.

## 2 CLASSIC INFUSION POWER RECLINER

Straight-arm design with 5” casters. Powered recline assists patients who are weaker or non-ambulatory in finding a comfortable recline position.

## 3 ASCENT INFUSION MANUAL RECLINER

Manual recline version, shown with optional back design.

### MAXIMIZE PATIENT VOLUME

Open design allows staff to quickly & efficiently clean chairs between patients.

### MAXIMIZE FLOORPLAN

Wall-hugger design reduces space between chair and wall to make room for more chairs.

### MINIMIZE DOWNTIME

Product durability, local customer service support & company techs keep chairs in service.
