

COURSE NAME

DESIGNING TREATMENT SPACES

COURSE NUMBER

CMI00010

CREDIT

1 LU/HSW

AIA/CES PROVIDER

404108909 CHAMPION MANUFACTURING

ABOUT THE COURSE

When selecting patient seating, special consideration should evolve around the need for acute medical attention should the patient require an immediate intervention. Form must follow functional requirements of a healthcare space, and the need for furniture to have clinical functionality is key to a successful treatment environment.

HSW JUSTIFICATION

Master planning of interior healthcare treatment spaces, involving criteria for safety and the acute/clinical needs of patient seating.

LEARNING OBJECTIVES

- Define why clinical functionality is crucial and required for safety.
- Design effective treatment spaces for the most acute patients.
- Identify the most critical, patient-centered element — the treatment recliner.
- Design a more efficient healthcare environment for staff.

CHAMPION MANUFACTURING INC

With 27 years of experience in healthcare, Champion leads the way in patient seating by supporting over 50 million treatments annually. Known for its durability, ease of cleaning and patient comfort, Champion recliners are sought after and continually specified as the gold standard for treatment recliners.

Champion was recently featured in Green Building & Design Magazine.
